# Girl Scout Property Reservations Solutions

Girl Scout councils face unique challenges in managing property rentals. When each camp contains multiple facilities with different schedules, options, requirements and pricing, it can be a full-time job just to manage availability queries, reservations and billing. And, many troop leaders can only make inquiries and reservations in the evening and on weekends, when your staff is out of the office.

Doubleknot makes it easy for councils to manage online scheduling, booking and payment for rental properties. As a result, your council can focus on creating memorable experiences that deliver your mission instead of juggling reservations calendars and tracking down reservation forms and payments. Doubleknot's property reservations solution for Girl Scouts includes:
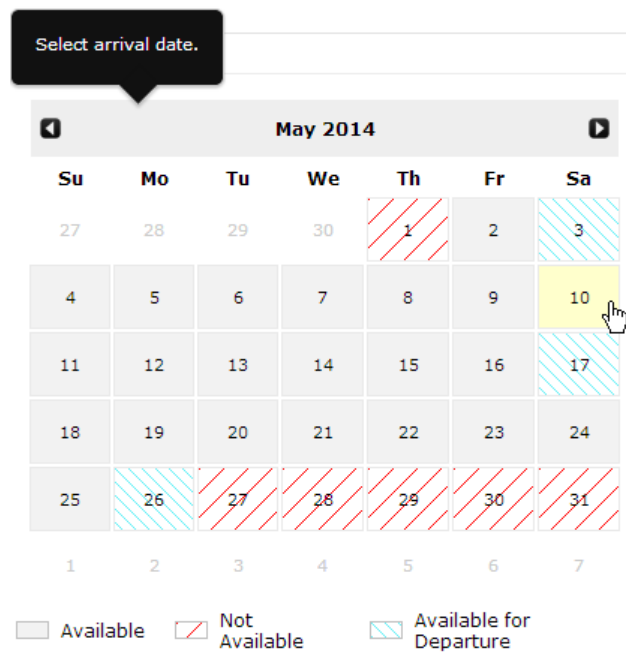

- A **searchable online availability calendar**, so visitors can view options at a glance and make reservations 24/7
- **Online and offline payment options**
- **Completely customizable calendars** to define availability and blackout periods for every asset at every property
- An **administrative booking calendar** and comprehensive analytics and reporting to improve planning and resource utilization
- **Support for custom information forms** that must be fully completed to submit the reservation
- **Capacity management features** to limit overall asset capacity, the number of attendees per booking, and the number of attendees of a specific type (for example, to ensure a specific ratio of adults to youth)
- **Council-defined relationships among rentable assets**—you can offer a cabin and a dining hall for separate or combined rental, and automatically remove availability when one or the other is rented
- **Flexible rental periods** so you can rent any asset by the day, night, hour or fraction of an hour with minimum and maximum rental periods
- **Properties can be configured to accept single or multiple reservations per rental period**, so a large facility can be shared by two or more unrelated groups

Best of all, Doubleknot offers complete turnkey services. We'll configure your property reservations solution to your exact specifications, set up online payment services and design the reservations screens to seamlessly fit into your existing web site. For visitors, renting a property can be as simple as this:

First, visitors select a category, facility, and time period.

The calendar automatically shows which dates are available. The visitor selects their dates and begins the checkout process.
